Sprint #3 Planning

Overview

Sprint #3 focuses on completing any tasks left unfinished from Sprint #2 and assessing the progress made by GR-Koala on the development of the user database. This evaluation will guide the determination of additional features to be developed, ensuring alignment with the database's capabilities and the overall project timeline. This phase is crucial for maintaining momentum and adjusting the project scope based on development realities and team capabilities.

Sprint Goals

1. Complete uncompleted tasks if any from Sprint #2 (📄 Sprint #2 Planning)
2. Create tasks that are dependent on changes on the user database

User Stories TBD during Sprint 3 Planning
